

SAGAR GUPTA

Survey Programmer | Technical Survey Analyst

+91 8090857784

careers.sagar@icloud.com

[LinkedIn](#) | [Portfolio](#)

Lucknow, India

PROFESSIONAL SUMMARY

Technical Survey Analyst with 5 years of experience across the full survey lifecycle — from complex scripting and multi-country programming to QA process ownership and client communication. Technically strong in Decipher, Python, JavaScript, jQuery, HTML, and CSS, with a track record of delivering error-free, compliant web-based surveys across global markets. Equally comfortable diving deep into code or stepping back to lead processes, support teams, and manage stakeholder expectations.

PROFESSIONAL EXPERIENCE

Technical Survey Analyst | Nielsen

July 2024 – Present · Mumbai, India

- ▶ Act as Point of Contact (POC) for LinkedIn's survey QA pipeline — coordinating team-level quality checks, implementing multi-layer review processes, and ensuring all projects are delivered error-free, compliant, and on time.
- ▶ Set up and maintain analytical dashboards for Spotify within Nielsen's internal reporting tool, integrating data from multiple sources to deliver clear, actionable reporting to clients and internal stakeholders.
- ▶ Partner with research, client services, and data science teams to understand project requirements, resolve technical challenges, and ensure successful survey delivery.
- ▶ Establish and enforce team-wide QA processes, standardizing pre-launch review workflows and quality checks to reduce errors and improve delivery consistency.
- ▶ Mentor junior survey programmers on scripting best practices, QA standards, and client communication skills.

Survey Programmer | Dynata

November 2021 – July 2024 · Hyderabad, India

- ▶ Developed strong expertise in end-to-end survey programming in Decipher — building complex web-based surveys with advanced skip logic, dynamic piping, quota management, and custom JavaScript and jQuery scripting from the ground up.
- ▶ Owned the full delivery cycle for each project — scripting, internal QA, client review rounds, and final launch — managing multiple concurrent surveys while maintaining quality and delivery timelines.
- ▶ Executed multi-country surveys spanning 15+ markets, managing translation integration, regional formatting, and compliance requirements across all projects.
- ▶ Maintained strong client relationships with US-based project managers — interpreting complex briefs accurately, flagging technical constraints early, and consistently meeting deadlines.

Survey Programmer (Internship) | NS Matrix Pvt. Ltd.

May 2021 – November 2021 · Delhi, India

- ▶ Built and tested web-based surveys using Decipher, HTML, CSS, and JavaScript, gaining hands-on experience in survey programming and quality assurance.
- ▶ Interpreted questionnaire specifications and translated survey requirements into working survey logic while supporting the end-to-end build and QA process.
- ▶ Conducted QA testing on assigned surveys, identifying and documenting issues before field launch to ensure accurate survey functionality and data quality.

KEY ACHIEVEMENTS

- ▶ **LinkedIn QA Ownership:** Served as primary QA point of contact for LinkedIn survey projects, building multi-layer review workflows and ensuring error-free, compliant, and timely delivery across all projects.
- ▶ **Spotify Dashboard:** Configured reporting dashboards for Spotify within Nielsen's internal tool, connecting multiple data sources to significantly improve client-level reporting visibility.
- ▶ **Multi-Country Execution:** Delivered multi-country surveys across 15+ markets at Dynata, independently managing locale scripting, translation coordination, and regional compliance requirements end-to-end.
- ▶ **Client Satisfaction:** Consistently earned high client satisfaction through accurate programming, clear communication, and reliable on-time delivery across a complex and varied project portfolio.

SKILLS

Survey Programming: Decipher, Skip logic, Piping, Quota Implementation, Fieldwork Management, Randomization, Loops, and Complex Survey Logic

Scripting: XML, Python, JavaScript, jQuery, HTML5, CSS3

Operations & QA: QA process setup, multi-layer quality checks, pre-launch testing, Cross-browser compatibility

Client & Team: Client communication, Stakeholder management, Team mentoring, Cross-functional collaboration

Multi-Country Surveys: 15+ market execution, translation coordination, regional compliance

Languages: English (professional proficiency), Hindi (native)

EDUCATION

Master of Computer Applications (MCA)

Kanpur Institute of Technology · 2019 – 2021
